Central Park Conservancy & New York
City Department of Parks

Date of Completion

2000

Exterior View

Originally designed as a folly in Central Park, the planning, restoration and redesign of the Belvedere Castle, was undertaken to meet the needs of a visitors information center and administrative offices for park rangers and maintenance staff. Work included the transformation of the basement into a functional office environment incorporating an ADA compliant bathroom, locker area and sufficient storage space. Additional work included the radon removal system and a complete upgrade of the HVAC, the electrical system. Our work also included the restoration of the exterior facade and roof terraces.
